Summary

Name	Documentation
 :Lecturer	Setting the schedule of each of the available courses, perform discussion where requested by the learner. During the learning activities, the lecturer will get the question submitted by the learner and set the answer of the question. After all the learning activities had been done, the lecturer will review the learning activities.
 :Registration	Providing the framework to set and get the course schedule onced the registration of the learner.
 :Learner	Get the schedule after registration, perform discussion with the lecturer, if have any question to ask the lecturer will submit question and after the lecturer set the answer, get the received answer

 :LearnAndDiscuss	A framework of the learning activities performed by the user. A place to perform any discussions.
 :LearnerActivity	The subclass of LearnAnd Discuss where the questions of the discussion is set or submitted and get from here.
 :LecturerActivity	Another subclass of LearnAndDiscuss where the answer of the discussion is set and get from here.
